The submission of any document herewith, which is not a statutory bar, is not intended as an admission that such document constitutes prior art against the claims of the present application or that such document is considered material to patentability as defined in 37 CFR §1.56(b). Applicant does not waive any rights to take any action which would be appropriate to antedate or otherwise remove as a competent reference any document which is determined to be a *prima facie* art reference against the claims of the present application.

RELEVANCE OF EACH DOCUMENT

The relevance of the foreign-language document is described in the present specification listed document was cited by the Japanese Patent Office (JPO) in connection with a counterpart application. In reference to the cited reference, the JPO stated as follows:

“Claims: 1 and 6

Cited Literature: 1 and 2

Remarks:

Controlling a display device from the specified terminal device via a network (see Cited Literature 1) and registering and updating display information as desired (see Cited Literature 2) is merely publicly known art within this field of technology. Further, giving the aforesaid terminal device and display device multiple constitutions is merely a matter that could be designed appropriately by persons skilled in the art, and we do not find any inventive step with respect to this point.

Accordingly, it is found that the constitutions according to Claims 1 and 6 of the subject application could have been easily arrived at by a person skilled in the art based on known techniques and items suggested Cited Literature 1 and 2.

Claims: 2 through 5

Cited Literature: 1 through 4

Remarks:

Cited Literature 1 describes having a means whereby information relating to display information is transmitted in accordance with the request from a portable terminal, and the aforesaid information relating to display information is given a desired display format such as listed information (see

Cited Literature 3), and using reservation acceptance information as the aforesaid information relating to display information (see Cited Literature 4) is merely a matter that could be designed appropriately by persons skilled in the art.

Accordingly, it is found that the constitutions according to Claims 2 through 5 of the subject application could have been easily made by person skilled in the art based on known techniques and items suggested Cited Literature 1 through 4.
